Site Plan Drawing For:

Existing Lots

Any application submitted to the Kent County Environmental Health Programs for our review or approval will require a site plan drawing prior to acceptance. The drawing must be drawn to scale (i.e. 1"=40'). The plan must identify percolation and other tests locations, proposed or existing septic systems, house location, driveway, rights-of-way or easements, proposed or existing wells to serve the property and any relevant datum concerning wells or disposal systems within 100 feet of the property line. Final grade and elevation contours will also be required when applicable.

New Lots (No Subdivision)

Prior to evaluating your lot a site plan must be submitted that is drawn to scale (i.e. 1"=40') and includes the following items:

- Topography
- Slope exceeding 15%
- Street location
- Building restriction lines
- Rights-of-way, utility or drainage easements
- Lot dimensions
- Lot area location of surface waters
- Location of water wells within 100' of property line
- Location of sewage disposal systems within 100' of property lines
- Proposed sewage disposal area
- Proposed well for property

Following the evaluation and prior to final approval the locations of all soil test pits must be accurately shown on the site plan which is to be submitted to our office.

Subdivisions

Pursuant to COMAR 26.04.03 a plat must be submitted and include:

- Topography in two foot contours
- Soil classifications
- Surface and subsurface drainage conditions
- Elevation of the water table
- Methods proposed for providing water supply and sewerage disposal
- Grading plan
- Proposed location of wells and sewage disposal areas
- Existing wells and septic systems within 100' of the subdivision
- Proposed wells for each lot

Four white copies of a plat drawn to scale showing street arrangements, building lines, rights-of-way, utility and drainage easements, lot dimensions, lot areas, and lot numbers must be submitted.
